SUMMARY

As a frontend developer, nearly a year of focused education and a strong commitment to self-improvement through hands-on projects have been integral to my growth. During this time, active participation in personal and collaborative projects has been instrumental in skill enhancement in web development.

Passionate about code composition and the creation of responsive designs, my aptitude for swiftly grasping new concepts and technologies is well-acknowledged. This proficiency enables the development of innovative solutions for intricate problems. Eager to continually acquire knowledge, various technologies, tools, and libraries are consistently explored.

Primary interests encompass frontend and web development, where skills in HTML, CSS, JavaScript, and React have been diligently refined. The pursuit of knowledge excites me, and a lifelong learning mindset is embraced.

WORK EXPERIENCE

Freelance, Ankara (Remote)

Sep 2023 – Present

Frontend Developer

Special Education and Rehabilitation Center, Ankara (Part Time)

Sep 2022 – Present
